

SAP Procedures Projects

SAP procedures for an energy company

The writing team has provided the writing and editing for numerous projects within an energy company for more than 7 years. They have worked with many departments, especially within the Finance Division.

Example: [Restarting a Workflow Document](#)

Client comment:

Clear and concise work procedures are key to ensuring end-user buy-in to changes in our business processes. Our multi-year relationship with H. Shoup & Associates provide us with the flexibility to ramp up, on an as needed basis, highly professional technical writers that we can depend on to execute to our writing standards at a price that we can afford.

William Davis, Director, Financial Systems and Processes
A Houston Energy Company

SAP implementation project

The writing team edited ten volumes (half) of the documentation for an SAP implementation project for a petrochemical company.

Company Subject Matter Experts (SMEs) took an Information Mapping® course and wrote the rough drafts. Shoup editors revised the documentation for readability, logic, standards, and grammar with a strong focus on consistency throughout the volumes.

Pharmaceutical project

The Shoup team wrote/edited SAP documentation for a global pharmaceutical company.

Note: SAP is a global administrative application used by many corporations.
